**CY2022 DOE Main Office
Secondary Internet Access Services**

ABC: Php3,050,000.00

Terms of Reference

I. BACKGROUND:

The provision of stable internet services is vital for the ICT network support services of the department. Daily computing operations such as email services, internet-based research and development of online information systems for transparency purposes are heavily dependent on a good network infrastructure and internet services. To date, the Department of Energy (DOE) Main Office which is located at Energy Center, Rizal Drive, Bonifacio Global City, Taguig City, have numbers of information systems installed/setup that are accessible via online to its stakeholders.

In consideration, ITMS-ITD deemed it necessary to establish an additional internet access connection/line from other Internet Service Provider (ISP) to increase reliability and network uptime in support of the above-stated trend. The additional internet service connection will act as a failover of the active network in the event of a failure or interruption in its usage or functioning. Such would ensure a continuous operation of all DOE in-house web-based information systems and applications (i.e. DOE and its related websites, e-mail, web based information systems application, etc.) in case of failure of services by the DOE's primary internet service provider.

The establishment of additional secondary or redundant ISP connection is necessary to prevent the aforementioned situation. This setup will assure service continuity of internet access at all times for its online information systems and other applications. Also, the secondary ISP shall be utilized in parallel with the primary internet service connection in order to expand the current bandwidth capacity of the DOE network.

II. SCOPE OF WORK:

a. Secondary Internet Access Services

- Install, configure and provide the DOE Main Office Fiber Optic (Fo) leased line internet access connectivity with a ***guaranteed 500Mbps or better*** bandwidth data line from provider's distribution point to DOE Data Center.
- Provide the DOE seven (7) Subscriber Identification Module (SIM) Only plans for one year for fast coordination and collaboration with service providers of any incidents and concerns relative to DOE internet access services and for 24x7 online monitoring and administration of DOE's ICT network/website, various information systems and services.

The plans shall have minimum monthly communication services of Unlimited All-Net Call and Text and have at least 30GB data allocation.

b. Other Related Services

- ISP shall provide all necessary devices (Customer Premise Equipment) and materials needed to completely install and terminate the internet connection.
- Handle site preparation
 - Establish a functional site for data communication devices.
 - ISP shall provide, install and configure communication devices (router and other network devices) to connect and enable the data link for the DOE.
 - Subject the data line to a 24-hour Bit Error Rate (BER) Testing and forward/submit the result to the ITMS - Information Technology Division (ITD) for approval before proceeding with the installation.
 - ISP shall provide, install and configure backup device in case provided device fails.
