ASEAN CENTRE
FOR ENERGY

ENERGY ECONOMICST

About

Established on 1 January 1999, the ASEAN Centre for Energy (ACE) is an intergovernmental organisation that independently represents the 10 ASEAN Member States' (AMS) interests in the energy sector. The Centre serves as a catalyst for the economic growth and integration of the ASEAN region by initiating and facilitating multilateral collaborations as well as joint and collective activities on energy. It is guided by a Governing Council composed of Senior Officials on Energy from each AMS and a representative from the ASEAN Secretariat as an ex-officio member. Hosted by the Ministry of Energy and Mineral Resources of Indonesia, ACE's headquarter is located in Jakarta.

Part of the efforts to fulfil its function as a regional centre of excellence that builds a coherent, coordinated, focused and robust energy policy agenda and strategy for ASEAN, ACE is conducting joint studies, policy dialogues and capacity buildings for ASEAN Member States to support the implementation of the ASEAN Plan of Action for Energy Cooperation (APAEC) 2016-2025.

To support the work, ACE is currently implementing the new project; ASEAN Climate Change and Energy Project (ACCEPT). It is a three-years joint project that will produce analysis and actionable recommendations to make ASEAN energy policies more coherent along two axes: (1) the axis between energy policy and energy-related climate policy within each ASEAN country, and (2) the axis between policies at the national and the regional levels.

The project will develop a survey tool to comprehensively assess and evaluate the four dimensions of the ASEAN Plan of Action for Energy Cooperation (APAEC): energy security, accessibility, affordability and sustainability. The data produced with the survey tool will be used develop (1) recommendations for the development of APAEC 2021-2025; and (2) a numerical planning model to generate alternative scenarios of national policies with higher degree of regional harmonisation, both are expected to be launched at the ASEAN Ministers on Energy Meeting in 2020. In addition, the project will generate written and oral advice for the energy authorities of the ASEAN countries. It will also feed into and inform the future development aid projects of international donors.

ACE would like to invite ASEAN nationals to apply for the position of Energy Economist.
