

Below are the comments from PALECO:

1. Net metering guidelines for off-grid areas.
2. Merit order dispatch versus priority dispatch indicated in the PSA
3. Guidelines for DUs/ECs who would like to venture into power generation business as sole owner or in joint venture with other companies
4. Creation of a council or a group who will monitor the performance of generation companies to ensure they are operating within the industry standards
5. Equip DUs/ECs with capability to conduct GIS / DIS
6. Provide a template for GIS/DIS and enumerate the standards that should be used
7. Require intermittent RE based power plants to provide an energy management system (EMS)
