

## POWER SUPPLY PROCUREMENT PLAN

### FIRST LAGUNA ELECTRIC COOPERATIVE, INC. (FLECO)

In compliance with the Department of Energy's (DOE) Department Circular No. DC 2018-02-0003, "Adopting and Prescribing the Policy for the Competitive Selection Process in the Procurement by the Distribution Utilities of Power Supply Agreement for the Captive Market" or the Competitive Selection process (CSP) Policy, the Power Supply Procurement Plan (PSPP) Report is hereby created, pursuant to the Section 4 of the said Circular.

The PSPP refers to the DUs' plan for the acquisition of a variety of demand-side and supply-side resources to cost-effectively meet the electricity needs of its customers. The PSPP is an integral part of the Distribution Utilities' Distribution Development Plan (DDP) and must be submitted to the Department of Energy with supported Board Resolution and/or notarized Secretary's Certificate.

The Third-Party Bids and Awards Committee (TPBAC), Joint TPBAC or Third Party Auctioneer (TPA) shall submit to the DOE and in the case of Electric Cooperatives (ECs), through the National Electrification Administration (NEA) the following:

- a. Power Supply Procurement Plan;
- b. Distribution Impact Study/ Load Flow Analysis conducted that served as the basis of the Terms of Reference; and
- c. Due diligence report of the existing generation plant

All Distribution Utilities' shall follow and submit the attached report to the Department of Energy for posting on the DOE CSP Portal. For ECs such reports shall be submitted to DOE and NEA. The NEA shall review the submitted report within ten (10) working days upon receipt prior to its submission to DOE for posting at the DOE CSP Portal.

The content of the PSSP shall be consistent with the DDP. The tables and graph format to be use on the PSPP report is provided on the following sheets. Further, the PSPP shall contain the following sections:

- I. Table of Contents
- II. Introduction
- III. Energy and Demand Forecast (10 year historical and forecast)
- IV. Energy Sales and Purchase
- V. Daily Load Profile and Load Duration Curve
- VI. Existing Contracts & Existing GenCos due diligence report
- VII. Currently approved SAGR for Off-Grid ECs to be passed-on to consumers;
- VIII. DU's Current Supply and Demand
- IX. Distribution Impact Study
- X. Schedule of Power Supply Procurement
- XI. Timeline of the CSP

## INTRODUCTION

### DISTRIBUTION UTILITIES PROFILE

The First Laguna Electric Cooperative, Inc. (FLECO) was incorporated and registered with the National Electrification Administration (NEA) on April 3, 1973, under Presidential Decree 269. The Operation of FLECO commenced on September 1, 1973, when it took-over the 7 private electric franchises and municipal systems. Initially, FLECO contracted a loan with NEA used chiefly as payment for taken-over private systems, rehabilitation of old lines and service expansion.

At present, FLECO provides electricity to 11 of the 16 municipalities in the 4th District of Laguna and has attained the 100% energization of the 164 barangays in its coverage area. The municipalities under the FLECO franchise area include Cavinti, Pagsanjan, Lumban, Kalayaan, Paete, Pakil, Pangil, Siniloan, Mabitac, Famy and Sta. Maria, all located in the northeastern part of the Province of Laguna, covering about 571 square kilometers.

Presently, FLECO's billed consumers are 94.76% residential as compared to 3.43% commercial, 1.56% public buildings and 0.25% industrial. Although the projected demand increase is still dominated by the number of billed residential consumers, establishment of big load consumers are also expected.

Since 2014, the 14MW energy requirement of FLECO is being supplied by GNPowder Mariveles Coal Plant, Ltd. (GMCP) with a 15 year long term contract, the deficit in the supply are temporarily drafted from the WESM until the approval of the additional 5-10MW capacity from SMC's LIMAY PREMIER POWER CORP (SMC). The additional capacity was considered in order to address the deficit in energy requirement due to the continuous increase in demand and to lessen market exposure.

FLECO is using a Linear with Smoothing forecasting method with a seven year historical data. Forecasted demand for the years 2018 onwards indicates an increasing growth of 4.4% that can be attributed to the establishments of some commercial and industrial buildings in the year 2017.

**LOAD PROFILE AND LOAD DURATION CURVE**

Based on the load curve above, FLECO's peak load is at 20MW, mid-merit at 13.5MW and a base load of 7MW.

GMCP supplied the 14MW requirement of FLECO and the uncontracted energy was drafted from WESM until the ERC approval of the 10MW SMC Power Supply Agreement. GMCP maintenance shutdowns were also scheduled annually during the months of February and March. The table above shows that the supply requirement level will generally improve once the SMC PSA has been approved. FLECO is also entitled to request additional contract capacity from SMC if there is an increase in the yearly demand not exceeding its maximum capacity of 10MW.

## DISTRIBUTION IMPACT STUDY

The total MVA capacity of FLECO is now at 40 MVA. It has 5 substations which are Pagsanjan, Lumban 1 & 2, Pakil and Famy substation and consist of 11 feeders. The forecasted increased of loads were compared to the existing installed capacity of the existing system. The forecasted demand at 90% power factor was then allocated based on the historical demand of per substation and then compared to the rated (ONAF) capacity (MVA) of per substation. At present, the 10MVA Pagsanjan, 10MVA Lumban 1 and 5MVA Lumban 2 Substation has a loading of 41.09%, 39.65% and 29.35% respectively. These substations have ideal stage of loading and will be sufficient to accommodate the load growth for the coming years. While the 5MVA Pakil Substation is loaded at 77.24%, it has a plan for upgrading to 10MVA capacity for the coming year 2019. The 10MVA Famy Substation serving three(3) feeders is also loaded at 80.46% and has a plan for upgrading to 20MVA capacity by the year 2020.

As per the Distributor's Compliance

Monitoring Report to the Philippine Distribution Code, 53 out of 97 reportorial documents were fully complied by FLECO for the year 2017. Some of the remaining non-compliant documents were not yet submitted because of unavailability of data/records and on-going establishment of procedure for each criteria.
