**Note:**  
 Excluding off-grid generators  
 Released as of 31 January 2025  
 Includes FIT Approved Plants based on RE Projects under FIT System as of Jan 2025  
 Installed Capacity - nameplate capacity; full-load continuous gross capacity of a unit under specified conditions, as calculated from the electric generator nameplate based on the rated power factor.  
 Dependable Capacity - maximum capacity when modified for ambient limitations for a specified period of time, such as a month or a season.  
 Installed and Dependable Capacity values may be updated as necessary.  
 For Solar Power Plants: Installed Capacity are MWP or MWDC values while Dependable Capacity are MWAC values  
 \* - For Self Generating Plants with asterisk (\*), no recorded installed capacity thus presented values are assumption from the declared dependable capacity divide by 0.8  
 \*\* - For Self Generating Plants with double asterisk (\*\*), no recorded dependable capacity thus presented values are assumption from the installed capacity multiplied by 0.8

**Legend:**  
 in GREEN - NEW ENTRY
